-
- Laboratory analysis designed to provide results as fast as possible.
 - When time is critical for homeowners involved in real estate transactions that require certain testing to secure financing or to satisfy lending institution requirements for potability.
 - These quick tests offer home inspectors the ability to provide feedback on water quality when reporting home inspection findings.
 - These are also very useful when speed is of the essence when there is concern of possible well contamination after flooding occurs or there is concern about septic intrusion.
 - Provides quick updates for retesting purposes.
